

Make smarter, faster decisions to manage costs and improve operations with PAR EverServ® Back Office solution.

Running a profitable business requires efficient scheduling, reporting and other administrative duties, but these tasks can consume a restaurant manager's day. PAR EverServ Back Office automates and streamlines daily administrative duties, allowing managers to focus on what really matters—customer service, employee mentoring and store performance. EverServ Back Office provides operational management support for PAR's EverServ QSR and PAR EverServ Heritage POS solutions.

EverServ Back Office provides managers with real-time operational information to quickly react and make smart decisions to improve operations and profitability. Streamline your forecasting and planning, inventory and purchasing, and labor scheduling with easy-to-use fully-featured modules. As an integrated suite, Back Office is easier to learn and support than stand-alone applications.

Improve the efficiency and effectiveness of your operations with PAR EverServ Back Office.

Benefits

Improved Decision Making – With real-time, actionable reports and alerts provides crucial transaction and business data enables you to make better decisions and act quickly.

Increased Manager Time in the Front of House – With automated administrative tasks, managers can spend more time on floor managing operations.

Simplified Implementation and Integration – Leveraging a service-oriented architecture, Back Office is easy to implement, integrate and support.

Optimized Labor Scheduling – Sophisticated, yet easy to use, labor scheduling features help you schedule the right people for the right jobs every time.

Improved Forecasting and Planning Accuracy – Improve the efficiency and profitability of your operations with advanced forecasts capabilities built on accurate programmable forecasting indexes and event tracking.

Optimize Food Costs – Optimize your food costs using tools that track physical counts, purchasing, receiving, waste, transfer, adjustments, and production, plus an interface that easily displays variances by category.

Improved Cash Management – Back Office delivers accountability and control with several layers of cash handling to help you improve safe management, deposit management, audit trails and expense management.

EverServ Back Office Features

- Information access by role
- Manager message board

ParTech, Inc. (PAR), a wholly owned subsidiary of PAR Technology Corporation, has built its more than three decades of success around delivering advanced point-of-sale and enterprise back-office solutions for restaurant operators worldwide. PAR has provided hardware, software and services to the world's largest restaurant chains and their franchisees for more than 30 years. The Company's extensive offerings are backed by PAR's global service network and its Boundless Hospitality™ vision for enhancing restaurant operations in a new era of dining out. The Boundless Hospitality vision drives the development of game-changing solutions, and is supported by a partner ecosystem that accelerates innovation more quickly than possible for any single company working independently. The Company has more than 50,000 installations in 110 countries worldwide. In addition to solutions for the restaurant industry, PAR products are improving the customer experience in retail, including the cruise, hotel, casino and entertainment industries. For more information visit the Company's Web site at www.partech.com.
